The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowed because claim 1 specifically requires a method of controlling the bow and skew of a backing material fed through a tufting machine including the step of aligning at least one elongate weft yarn marker with a needle bar so that the at least one weft yarn marker is substantially parallel to the needle bar.

Claim 6 and its dependent claims are allowed because claim 6 specifically requires a method of controlling the bow and skew of a backing material fed through a tufting machine including the step of aligning at least one elongate weft yarn marker with a needle bar so that the at least one weft yarn marker is substantially parallel to the needle bar.

Claim 20 and its dependent claim is allowed because claim 20 specifically requires a method of controlling the bow and skew of a backing material fed through a tufting machine including the step of aligning at least one elongate weft yarn marker with a needle bar so that the at least one weft yarn marker is substantially parallel to the needle bar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.".

The patent to Kirzinger et al is cited to disclose a marker thread 26, Fig. 2 that is substantially thicker than other weft filaments of a filamentary web. The Beckstein

Art Unit: 3765

patent discloses a method comprising the steps of measuring the position of a weft thread in a moving textile fabric and of aligning the weft thread.
